Tales of a Time Traveler

In Tales of a Time Traveler, you will discover that time is not so easily defined. Time is illusive, impossible to hold. It can't be owned. It can't be stopped. Time travel surrounds you – from the biological clock in your brain and the changing shadows on a sundial, to the history of life on Earth. Then the story expands to the lives of stars, the time scale of the Big Bang, and the distortion of time by gravity. Produced by Evans & Sutherland Digital Theater in association with Houston Museum of Natural Science. Narrated by David Tennant. Visit our website for showtimes and to register.
